#4. Interpret the graph.
#The graph, titled "Sentiments of Tweet Per day" is a bar graph starting from
#the day of July 14 to July 20 of the year 2020.
#It is categorized by 3 sentiments namely:
#Negative(Red), Neutral(Yellow), and Positive(Blue) in which could reveal the mood or tone of the said
#Negative Sentiment: These tweets convey discontent, disapproval, or negative sentiments.
#This is the most noticeable sentiment being conveyed in the following days.
#On specific dates like July 15 and July 21, 2020, there was a notable uptick in negative tweets,
#indicating fervent discussions or concerns.
#Neutral Sentiment: These tweets maintain an even-handed and unbiased tone,
#presenting information objectively.
#Throughout July 2020, including days like July 14, 15, 17, 18, and 21,
#neutral sentiments were prominent, reflecting a range of non-partisan discussions.
#Positive Sentiment: This category encompasses tweets that radiate
*positivity, enthusiasm, and a hopeful perspective.
#Despite the presence of negative sentiments on specific days, such as July 14, 15, 17, 18, and 21,
#positive tweets also shone through, signifying resilience, hope,
#or an optimistic outlook amidst diverse sentiments.
#This graph effectively encapsulates Twitter's sentiment dynamics in July 2020.
#It underscores fluctuations in Negative, Neutral, and Positive sentiments on specific dates,
#offering a concise overview of the emotional landscape during that period.
